No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (21 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1982 articles are the same as those shown for current articles.

CONTENTS OF VOLUME 46

NUMBER 1, APRIL 1982

U. SCHUMANN AND J. BENNER. Direct Solution of the Discretized Poisson-Neumann Problem on a Domain Composed of Rectangles	1
BRUCE I. COHEN, A. BRUCE LANGDON, AND A. FRIEDMAN. Implicit Time Integration for Plasma Simulation	15
A. E. CURZON. A Method for Solving $J_1(x) Y_1(px) - J_1(px) Y_1(x) = 0$	39
GABRIEL RAGGIO. On the Kantorovich Technique Applied to the Tidal Equations in Elongated Lakes	43
ZHEN-HUAN TENG. Elliptic-Vortex Method for Incompressible Flow at High Reynolds Number	54
A. I. SHESTAKOV, J. KILLEEN, AND D. D. SCHNACK. A Numerical Model for Nonaxisymmetric <i>MHD</i> Instabilities	69
DIMITRI MIHALAS AND RICHARD I. KLEIN. On the Solution of the Time-Dependent Inertial-Frame Equation of Radiative Transfer in Moving Media to $0(v/c)$	97
STEPHEN H. LEVENTHAL. An Operator Compact Implicit Method of Exponential Type	138

NOTES

C. E. WILSDON. An Approximate Method for Evaluating the Ratio of Two Complete Elliptic Integrals of the First Kind	166
ANNOUNCEMENT	168
LIST OF FORTHCOMING ARTICLES	169

NUMBER 2, MAY 1982

A. R. BARNETT. Continued-Fraction Evaluation of Coulomb Functions $F_\lambda(\eta, x)$, $G_\lambda(\eta, x)$ and Their Derivatives	171
D. V. ANDERSON, J. BREAZEAL, AND C. B. SHARP. Calculations of 3D Mirror Equilibria Using a Finite-Element Vector Potential Representation	189
J. A. BELWARD. Numerical Solutions of the Traction Problem for a Fibre-Reinforced Material by an Integral-Equation Method	215
R. D. M. GARCIA AND C. E. SIEWERT. Multigroup Transport Theory with Anisotropic Scattering	237
J. U. BRACKBILL AND D. W. FORSLUND. An Implicit Method for Electromagnetic Plasma Simulation in Two Dimensions	271

D. HEIFETZ, D. POST, M. PETRAVIC, J. WEISHEIT, AND G. BATEMAN. A Monte-Carlo Model of Neutral-Particle Transport in Diverted Plasmas	309
LIST OF FORTHCOMING ARTICLES	328

NUMBER 3, JUNE 1982

JOHN H. MAHAFFY. A Stability-Enhancing Two-Step Method for Fluid Flow Calculations	329
J. U. BRACKBILL AND J. S. SALTZMAN. Adaptive Zoning for Singular Problems in Two Dimensions	342
NANCY K. NICHOLS AND ROLAND ENGLAND. Numerical Solution of an Elastic Boundary Layer Problem Using a Multiple Shooting Technique	369
ALEXANDRE JOEL CHORIN. Numerical Estimates of Hausdorff Dimension	390
W. K. STEVENS AND C. H. SU. Three-Dimensional Steady Stratified Flows: A Numerical Approach	397
ANDREW D. BOOTH. On the Anharmonic Oscillator	423
R. A. GINGOLD AND J. J. MONAGHAN. Kernel Estimates as a Basis for General Particle Methods in Hydrodynamics	429
R. MORROW. Space-Charge Effects in High-Density Plasmas	454

NOTES

ANDREA PROSPERETTI. A Method for the Solution of a Class of Singular Volterra Integro-differential Equations	462
JOE D. HOFFMAN. Relationship between the Truncation Errors of Centered Finite-Difference Approximations on Uniform and Nonuniform Meshes	469

ANNOUNCEMENT	475
LIST OF FORTHCOMING ARTICLES	476
AUTHOR INDEX FOR VOLUME 46	477

Journal of Computational Physics
INFORMATION FOR AUTHORS

Articles

The purpose of the *Journal of Computational Physics* is to publish articles concerning techniques developed in the solution of data handling problems and mathematical equations, both arising in the description of physical phenomena.

Manuscripts should be submitted to: *Journal of Computational Physics*, Lawrence Livermore National Laboratory, University of California, P. O. Box 5509, L-561, Livermore, California, 94550.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the *Journal of Computational Physics* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Form of Manuscript. Manuscripts should be typewritten with wide margins on high quality 8.5 x 11 bond paper, using double spacing throughout. The original and two copies should be submitted; however, in order to expedite handling of manuscripts, the original and four copies would be desirable. Copies should include figures and tables.

Each page of the manuscript should be numbered. The first should contain the article title, author and coauthor names and complete affiliation(s). At the bottom of this page, the number of manuscript pages, figures, and tables should be noted. The second page should contain a proposed running head of less than thirty-five characters. It should also contain the name and complete mailing address of the person to whom proofs are to be sent.

With the exceptions noted below, authors should be guided by the Style Manual of the American Institute of Physics.

Subject Classification. As of January 1981 authors are required to classify their own manuscripts using the 1980 *Mathematics Subject Classification*, reprinted from the 1978 *Mathematical Reviews Index*, pp. S27-S34, with the additional classifications listed in the January 1, 1981 issue. Authors are requested to choose at least two categories, one in numerical analysis category, 65, and one other, generally a physical classification, from the categories beyond 65. Page one should contain at least two such classification index numbers.

Abstract. Page 3 should contain a short abstract.

List of Symbols. It is of vital importance that the author submit a complete list of symbols. The symbols used should be identified for the typesetter **phonetically**. This list will not appear in print, but is essential to avoid costly corrections in proof.

Tables. Number tables consecutively with Roman numerals. Extensive tables will be reproduced as photoengravings, and should be typed carefully in the **exact** format desired. Authors will be charged for any new engravings necessitated by changes in proof. Use superscript lower-case italic letters (*a*, *b*, *c*) for table footnotes, which should be typed immediately below the table. Type tables at least double-spaced, including titles and footnotes. Do not underline table titles; reserve underlining for text that is to be *italicized*.

Equations. Equations should be typewritten whenever possible, and the number placed in parentheses at the right margin. Reference to equations should use the form "Eq. (3)" or simply "(3)". Superscripts and subscripts should be typed or handwritten clearly above and below the line, respectively. Use the exponent $1/2$ whenever possible.

References. References should be cited in the text by a number in square brackets. Literature cited should appear on a separate page at the end of the article, and should be styled and punctuated according to the following examples:

1. J. G. DEE, *Ann. Phys.* 61 (1969), 880.
[Underline only names of journals.]
2. R. P. SHUTT, "Bubble and Spark Chambers," Vol. 2, p. 50, Academic Press, New York/London, 1967.
3. W. B. THOMPSON, Kinetic Theory of Plasma, in "Advanced Plasma Theory" (M. N. Rosenbluth, ed.), Chap. 1, Academic Press, New York, 1964.

For unpublished lectures or symposia, include title of the paper, name of the sponsoring society in full, and date. For journal names, follow the style of Chemical Abstracts' *Service Source Index*. Abbreviation of AEC Laboratory Report names should follow the style of *Nuclear Science Abstracts*.

Footnotes. Footnotes in the text should be avoided if at all possible. If they must be used, identify by superscript numbers and type together on a separate page, double spaced.

Figures. All illustrations are to be considered as figures. Number each graph or drawing in sequence with Arabic numerals. Supply a descriptive legend for each figure. Type legends double-spaced consecutively on a separate page. The original figures are required. Copies are unacceptable.

Plan figures to fit the proportion of the printed page. Use a professional lettering set on the original so that the letters and numbers are large enough and "open" enough to take a reduction of 50 to 60 % without filling in with ink. Do not include background grids; however, on paper with blue lines the grid can be eliminated in the process of photoreproduction. Identify each figure in a margin with the name of the journal, author's name, and figure numbers; avoid marking the backs of figures.

Proofs. Galley proofs will be sent to the author with a reprint order form. Authors will be charged for alterations in excess of 10 % of the cost of composition.

Reprints. Fifty reprints without covers will be provided free of charge. Additional reprints may be purchased.

Notes

Short notes regarding the availability of interesting and useful new programs or tabular material will be considered for publication. Letters to the Editor commenting on articles already published in this Journal will also be considered. Neither notes nor letters should have an abstract.
